

## ADITYA PATNE

### Data Analyst | AI Data Trainer & Evaluator

adityapatne001@gmail.com | +91 8983424820

linkedin.com/in/adityapatne001 | github.com/adityapatne001

### SUMMARY

Data Analyst and AI Data Trainer with hands-on experience in Python, Pandas, SQL, Excel, Power BI, and AI response evaluation. Experienced in data cleaning, transformation, analysis, visualization, and reporting, as well as evaluating AI-generated outputs using structured quality guidelines and evidence-based reasoning. Built practical analytics and AI workflow applications using Python, Streamlit, Gemini API, PostgreSQL, Power BI, and Azure Data Factory. Strong in analytical problem-solving, data quality assessment, model-output evaluation, and translating structured data into actionable insights.

### SKILLS

**Data Analytics:** Python, Pandas, NumPy, SQL, Excel, Power BI, Power Query, DAX, Matplotlib

**AI Training & Evaluation:** AI Response Evaluation, Comparative AI Model Evaluation, Prompt Evaluation, AI Output Quality Assessment, Instruction-Following Evaluation, Evidence-Based Rationale Writing, Prompt Engineering, LLM Workflows

**Databases & ETL:** PostgreSQL, SQL Server, Azure Data Factory

**Tools & Development:** Streamlit, Gemini API, Git, Github, VS Code, pgAdmin, SSMS, Azure Data Studio, ChatGPT, Google Gemini, Ubuntu (WSL)

### PROFESSIONAL EXPERIENCE

#### Independent Contractor - AI Data Trainer (Freelance) | Remote

June 2026 - Present

- Evaluated AI-generated responses using structured quality guidelines and evaluation rubrics.
- Compared AI outputs for factual accuracy, relevance, clarity, completeness, and instruction following.
- Produced evidence-based rationales to support consistent evaluation and ranking decisions.
- Identified inconsistencies, unsupported claims, reasoning issues, and failures to satisfy user requirements.
- Maintained quality and consistency while independently following detailed and evolving project guidelines.

#### Associate Engineer - NOC | Tata Communications Limited, Pune

February 2020 - March 2020

- Monitored network operations and incident alerts within a real-time operational environment.
- Worked with structured workflows, issue-tracking processes, and operational reporting systems.
- Developed attention to detail while handling time-sensitive monitoring and support activities.

### PROJECTS

#### Corporate Data Analysis & Reporting Tool | Python, Pandas, Matplotlib

- Developed a Python-based application for analyzing CSV and Excel data through structured data-cleaning, aggregation, and reporting workflows.
- Used Pandas for data cleaning, filtering, transformation, aggregation, and generation of business-oriented analytical summaries.
- Created visual summaries using Matplotlib and automated report-generation workflows.
- Applied AI-assisted development and structured prompting for feature development, debugging, and iterative workflow refinement.

### **AI Response Evaluation & Prompt Optimization Studio | Python, Streamlit, Gemini API**

- Developed an AI-assisted application simulating prompt QA and AI evaluation workflows.
- Built a structured system for comparing and scoring AI-generated responses across clarity, relevance, accuracy, and instruction following.
- Implemented AI-assisted evaluation feedback, prompt optimization, and response-comparison workflows using Gemini API.
- Added evaluation history, report exporting, and prompt-quality analysis features.
- Applied modular Python architecture to create a practical GenAI evaluation workflow.

### **Retail Sales Analysis Dashboard | PostgreSQL, Excel, Power BI**

- Analyzed relational datasets using SQL JOINS, CTEs, aggregations, and window functions.
- Cleaned and transformed datasets using Excel and Power Query.
- Developed interactive Excel and Power BI dashboards for KPI tracking and business analysis.
- Created DAX measures for Total Sales, Profit %, YTD, SPLY, and YoY Growth.
- Analyzed sales trends and performance patterns to generate business insights.

### **COVID-19 Data Pipeline | Azure Data Factory, Azure SQL, Azure Data Lake**

- Built an ETL pipeline using Azure Data Factory for ingestion and processing of public COVID-19 datasets.
- Managed data movement between Azure Data Lake Storage and Azure SQL Database.
- Scheduled and monitored pipelines to support data consistency and reliability.

### **TRAINING & CERTIFICATIONS**

- **AI Powered Python** - Certified, Project-Based Training, 2026
- **Excel Formula Mastery Using AI** - Certified Workshop, 2025
- **Power BI** - Certified, Project-Based Training, 2025
- **SQL** - Certified, Project-Based Training, 2025
- **Excel for Data Analysis** - Project-Based Training, 2025

### **CIVIL SERVICES EXAMINATION PREPARATION | 2019-2024**

Developed analytical reasoning, research, reading comprehension, written communication, information synthesis, and structured problem-solving skills through extensive examination preparation and self-directed study.

### **EDUCATION**

- Bachelor of Engineering - Electronics & Telecommunication | Dr. D. Y. Patil Institute of Technology, Pimpri, Pune  
Graduated: 2018 | 70.6%
- Diploma - Electronics & Telecommunication | Government Polytechnic, Amravati  
Completed: 2015 | 80.53%
