SUMMARY

Analytical and detail-oriented engineering graduate with hands-on experience in AI response evaluation, prompt engineering, AI-assisted workflows and Python development. Experience evaluating AI-generated outputs using structured quality guidelines, comparative analysis and evidence-based rationale writing. Built practical AI workflow applications using Python, Streamlit and Gemini API, complemented by experience working with modern AI development tools and command-line environments. Skilled in Python, SQL, Excel and Power BI for workflow automation, reporting and analytical problem-solving. Seeking opportunities in AI Operations, AI Evaluation, Prompt Engineering and GenAI workflow roles.

SKILLS

- **AI & Generative AI** - Prompt Engineering, AI Response Evaluation, Comparative AI Model Evaluation, AI Output Quality Assessment, Prompt Optimization, Instruction-following Evaluation, LLM Workflows, AI-assisted Development Workflows
- **Programming** - Python (Pandas, NumPy, Matplotlib, Streamlit)
- **Data & Analytics** - SQL, Excel, Power BI, Power Query
- **AI & Development Tools** - ChatGPT, Google Gemini, VS Code, Ubuntu(WSL), Claude Code

PROFESSIONAL EXPERIENCE

Independent Contractor - AI Data Trainer (Freelance) | Remote

June 2026 - Present

- Evaluated AI-generated responses using structured quality guidelines and evaluation rubrics.
- Compared AI model outputs for clarity, instruction-following, factual accuracy and overall quality.
- Produced evidence-based rationales to support consistent evaluation decisions.
- Worked with modern AI development tools and command-line environments while completing structured AI evaluation tasks.
- Maintained quality and consistency while following evolving project documentation and evaluation guidelines.

Associate Engineer - NOC | Tata Communications Limited, Pune

February 2020 - March 2020

- Monitored network operations and incident alerts within a real-time operational environment.
- Worked with structured workflows, issue tracking processes and operational reporting systems.
- Developed attention to detail while handling time-sensitive monitoring and support activities.

PROJECTS

AI Response Evaluation & Prompt Optimization Studio | Python, Streamlit, Gemini API

- Developed an AI-assisted workflow application to simulate Prompt QA and AI Operations processes using Python and Streamlit.
- Built a structured evaluation system to compare and score multiple AI-generated responses across metrics including clarity, relevance, accuracy and instruction-following.
- Implemented AI-assisted evaluation feedback, prompt optimization analysis and response comparison workflows using Gemini API.

- Designed operational features including evaluation history tracking, report exporting and prompt quality analysis.
- Applied modular Python architecture and workflow-oriented design principles aligned with emerging GenAI evaluation and AI workflow support roles.

Corporate Data Analysis & Reporting Tool | Python (VS Code)

- Built a GUI-based corporate reporting application for CSV/Excel analysis using Python.
- Implemented AI-assisted workflow development using structured prompting techniques for feature generation, debugging and refinement.
- Developed interactive report generation, aggregation and visualization modules.
- Automated report export workflows and dynamic chart generation for non-technical users.
- Applied iterative prompt refinement and analytical reasoning to improve functionality and usability.

Retail Sales Analysis Dashboard | PostgreSQL, Excel, Power BI

- Performed structured data analysis using SQL queries, JOINS, CTEs and window functions.
- Cleaned and transformed datasets using Power Query and Excel.
- Developed KPI-driven dashboards and analytical reports using Power BI.
- Applied analytical reasoning to identify trends, performance patterns and sales insights.

COVID-19 Data Pipeline | Azure Data Factory

- Built a structured ETL pipeline for ingesting and processing public COVID-19 datasets.
- Managed data movement between Azure Data Lake and Azure SQL Database.
- Monitored workflow consistency and data reliability through scheduled pipeline execution.

TRAINING & CERTIFICATIONS

- **AI Powered Python** - Certified, Project based training, 2026
- **Excel Formula Mastery Using AI** - Certified Workshop, 2025
- **Power BI** - Certified, Project based training, 2025
- **SQL** - Certified, Project based training, 2025
- **Excel for Data Analysis** - Project based training, 2025

CIVIL SERVICES EXAMINATION PREPARATION 2019 - 2024

- Developed advanced reading comprehension, structured reasoning and analytical interpretation skills through extensive study and answer-writing practice.
- Strengthened written communication, information synthesis and attention to detail while analyzing complex subjects and large volumes of information.
- Built consistency, discipline and structured problem-solving abilities through long-term preparation and self-managed learning.

EDUCATION

- Bachelor of Engineering (Electronics & Telecommunication) | Savitribai Phule Pune University
Graduated: 2018 | Percentage: 70.6%
- Diploma (Electronics & Telecommunication) | Government Polytechnic, Amravati
Completed: 2015 | Percentage: 80.53%

LANGUAGES

English, Hindi, Marathi
